

Presents to you...

SCINTIGLOTM

Smart. Portable. Reliable.

A smart, portable diagnostic device for detecting **Microalbuminuria / Microproteinuria** with unmatched accuracy.

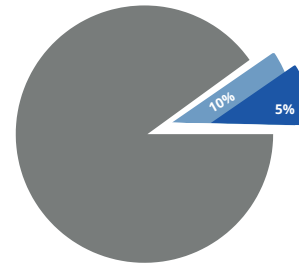

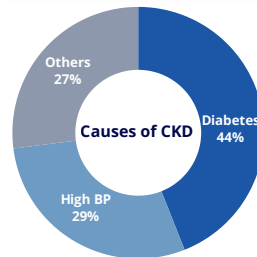

"Great things do come in smart packages"

Technology developed and product manufactured
Proudly in India.

THE NEED:

Every **1 in 10** people suffer from **CKD (Chronic Kidney Disease)**

■ Pregnant women in India
■ Hypertensive disorders
■ Pre-eclampsia

People with **Diabetes & Hypertension** are at the highest risk of CKD.

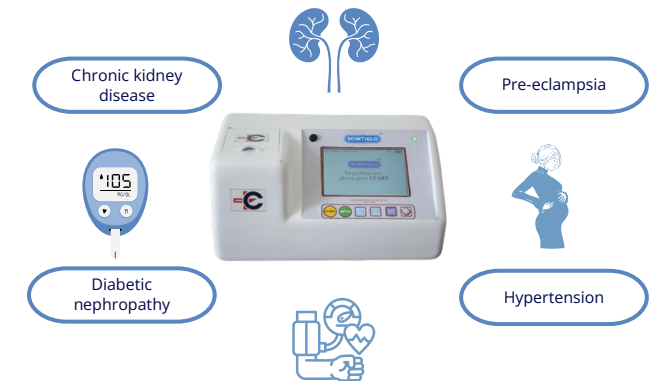

Pre-eclampsia is reported to be 8-10% among the pregnant women in India.

IDEAL FOR:

DEVICE CHARACTERISTICS

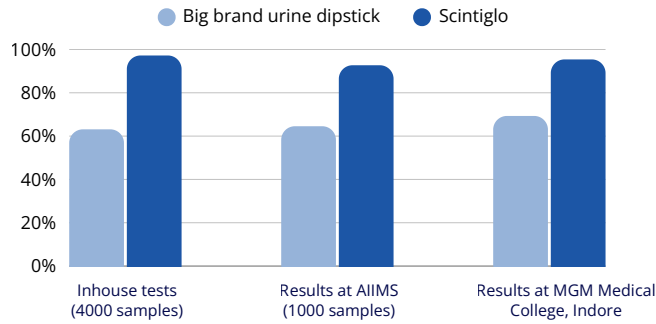

- Detects all proteins, not just albumin/microalbumin.
- Detects proteins in urine as low as 2 mg/100 mL
- Detection range: 2–50 mg/100 mL
- Portable device with carry bag and all required consumables.
- Single reagent in a convenient dropper bottle.
- Does not require an air-conditioned environment / cold chain.
- Rechargeable battery-operated
- Easy-to-read, coloured graphic 3.5-inch LCD
- Convenient touch input
- Data transfer via Bluetooth or USB to smartphone/PC
- Option for thermal printer available, if required.

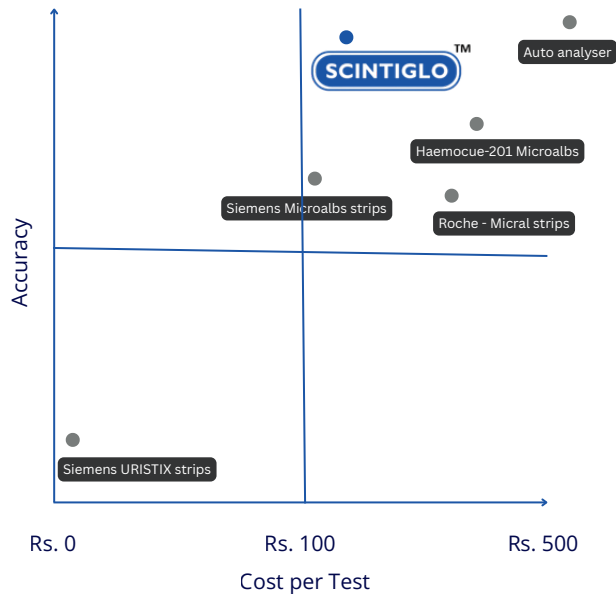

USP

A smart point-of-care device that offers lab-grade accuracy and unmatched affordability for early detection of high-risk pregnancies and kidney disease using a simple, non-invasive urine test with instant results.

ACHIEVED ACCURACY

WHERE DO WE STAND IN COMPETITION

Feature	Auto Analyzer	Dipstick	Scintiglo
Device Cost	Very High	Low	Affordable
Test Cost	Moderate	Low	Low
Accuracy	High	Low-Medium	High
Setup Needed	Full Lab	None	None
Easy to Use	No	Somewhat	Yes
Digital Report	Optional	No	Yes
Use at Point-of-Care	Not Suitable	Yes	Yes
Testing Method	Immuno-turbidimetry	Acid-base Reaction	Nephelometry

- Portable with lab like accuracy
- Instant report generation
- Results within 2-3 seconds
- App connecting feature

Proprietary Reagent

Box pack of 100 single use test kits

Pack of 50 single use test kit

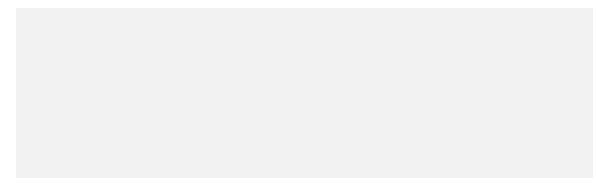

Scintiglo gives you lab-level accuracy in the palm of your hand: fast, easy, and digital.

PROJECT SUPPORTED BY

Founded in 2014, we are med-tech startup company incubated from IIT Delhi working in high-thrust areas of developing medical devices and contributing towards Aatmanirbhar Bharat.
